

ANTIFOAM D

Silicone free – process antifoam.

Features & Benefits

- Best economy in use. Highly concentrated antifoam results in increased savings in use.
- Antifoam D disperses quickly and evenly in the water.
- Can be used in metal industries, food processing and effluent treatment.
- Silicone free, can be used on components prior to painting.

Use Directions

Note that often introduction of engine oils and other contaminants can produce foaming. Carefully isolate all such contaminants.

Use at the rate of 1 to 2 mls per 1000 litres of water.

Packages

2x5 litre cartons.
