

BLACKOUT (NEW)

Formaldehyde – free fluid for portable toilets.

Introduction

Formaldehyde has been used for many years in chemical toilets. Currently, formaldehyde is classified as a substance suspected of producing cancer in man. In addition, formaldehyde is an irritant to nasal passages and can cause asthma attacks in humans. For all these reasons, users are now demanding formaldehyde-free products. Blackout (New) is a product, which is now successfully replacing old-fashioned formaldehyde-based fluids.

Features and Benefits

- Destroys bacteria thereby eliminating all malodors.
- Intense blue colour completely masks contents of pan.
- Floral fragrance provides a long lasting fresh perfume in areas where is it most required.
- Blackout (New) is safe and does not burn or corrode materials.
- Dissolves instantly for immediate performance.
- Safe to use –presents no inhalation hazard, as it is formaldehyde-free.

Use Directions

- 1) For portable toilets in aircraft, coaches and trains, use 10 mls to 20 mls per litre of water in the initial charge of the system.
- 2) For outside hire toilets use 30 mls per litre of water used in initial charge.

First Aid

Of poisoning occurs, contact a doctor or Poisons Information Centre. If swallowed, do NOT induce vomiting. Give water or milk then raw egg. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

Packages

20 litre containers
