

## CHEMFOREST

Commercial grade reodoriser and disinfectant air freshener.

### Description

Chemforest is an effective product for large scale disinfecting, cleaning and reodorising of commercial premises. It may be used to great advantage in the maintenance of floors and walls throughout industry and institutions.

### Approvals

Chemforest is approved under The Therapeutic Goods Act (Commercial Grade) at a dilution of 1:100. Full details of test are available on request.

### Features and Benefits

- Chemforest saves time. It cleans, reodorises and kills bacteria in one easy operation.
- It is versatile and is safe to use on all washable surfaces.
- Chemforest contains powerful disinfectant, which actually kill the bacteria that cause malodours.

### Use Directions

For general cleaning and reodorising, mix one part of Chemforest with 50 parts of warm water. Swab or mop onto surfaces. Remove excess water and allow to dry.

For use as an air freshener, use at a dilution of 1:50 through a Chemform spray applicator.

### Packages

2 x 5 litre and 25 litre containers.
