

DP-209

Neutralizer for acidic products.

INTRODUCTION

Acidic by-products and effluents occur throughout industry. The uncontrolled discharge of acids into the environment is now forbidden. The need to control pollution of ground water, inland water, rivers and the oceans has resulted in legislation which imposes penalties for the discharge of acids into the environment. DP-209 turns hazardous polluting wastes into safe biodegradable effluent.

PRODUCT SPECIFICATION

Appearance	:	Yellow viscous liquid
Odour	:	Nil
Specific Gravity	:	1.4
pH (1% solution)	:	13.0
Flash Point	:	Nil
Solubility in water	:	Complete

Features and Benefits

- Quickly and efficiently neutralizes all acidity, allowing for the easy disposal of otherwise hazardous materials.
- A highly concentrated source of alkalinity.
- Very cost effective.
- Dissolves instantly and safely in water.
- Does not give off dangerous or corrosive fumes.

Packages

25 L and 205L drums
