

## FABRICARE

Fabric Softener and bactericide

### Features & Benefits

- The regular use of Fabricare conditions the surface of all fabrics. The textile fibres are lubricated, reducing the tendency of washed items to tangle and crease.
- Fabricare acts as an anti-static agent, which is particularly effective on synthetic fabrics to reduce linting.
- The delicate perfumes in Fabricare remain in the fabrics, imparting a fresh and delicate fragrance to garments.
- Adds a slight germicidal finish to the fabric and helps to prevent the formation of mildew.
- Increases the fabric life.
- Imparts a luxurious softness and feel to towelling, woollens, nappies, cottons and synthetics.

### Use Directions

Final Rinse: Add 100ml of Fabricare for each 50 kilos of washing.

With Sour: Add the required quantity of sour together with Fabricare directly to the wash.

### Packages:

5L and 20L containers
