

## LC CONCENTRATE

Concentrated system for on-premise laundries.

### DESCRIPTION

The LC range is a concentrated on-premise laundry system that comprises of chemicals that are effective, economical in use, safe to handle and easy to store.

### FEATURES & BENEFITS

Concentrated:	Saves packaging which reduces waste and carbon footprint.
Automatically Dispensed:	Ensures chemical dose is correct, every time, which reduces chemical wastage and ensures effective results.
Safety:	All LC products utilise a product safety insert for discharge via Chemform automated feed systems. This eliminates contact with the product.
Compact:	All products are off the floor for safety and cleanliness.
Versatile:	Suitable for all wash conditions.
Savings:	Can be used for cold water washing which reduces rinse programs & saves significant water and energy costs.

### PRODUCTS

LC ENVIROBREAK:	A safer, environmentally friendly, free rinsing alkali.
LC ALKALI:	A highly concentrated alkaline builder
LC DETERGENT:	A highly concentrated readily biodegradable detergent incorporating powerful grease removers.
LC OXY:	Hydrogen peroxide bleach for the removal of stains from coloured and white fabrics.
LC COLD WATER SANITISER:	A cold water bleach/sanitiser that meets Australian Standards for cold water disinfection
LC BLEACH:	Stabilised chlorine stain remover for whites only.
LC CONDITIONER:	Fabric softener.
LC SOUR:	A safer, environmentally friendly laundry sour to neutralize residual alkalinity in the final rinse

### USE DIRECTIONS

As each wash classification requires different quantities of each LC product your Chemform representative will establish and monitor the correct amount of each for each wash program.
