

## M.D.A

Machine descaling acid.

### Introduction

In areas of excessive hardness, the minerals which occur naturally in the water may form white deposits called scale. The scale can block jets and generally interfere in the dishwasher's cleaning process. When this occurs, the machine must be descaled quickly and safely using M.D.A.

### Features and Benefits

- \* M.D.A. acts quickly and efficiently to remove, in one operation, all hard water scale from commercial dishwashers.
- \* M.D.A. is inhibited so that, when used as directed, attack on metals in the dishwasher is eliminated.

### Product Specification

Appearance:	Thin yellow liquid
Odour:	Very slightly acidic
Density:	1.30
Flash Point:	Nil
Contains:	Phosphoric acid and inhibitors

### Use Directions

For use in descaling commercial dishwashers only.

The descaling operation will be undertaken by your Chemform representative as part of our service package. However, where the descaling operation is undertaken by users, the following guidelines should be followed:

- Turn off electronic feeder unit.
- Fill wash tank with 2 litres of M.D.A.
- Operate machine for a full cycle and dump wash water. Refill wash tank with water, run full cycle and dump water again.
- Refill detergent tank, turn on electronic feeder unit.

### Hazards

M.D.A. is hazardous. Avoid contact with product.

### First Aid

If poisoning occurs, contact a doctor or Poisons Information Centre. If swallowed, do NOT induce vomiting. Give a glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

### Packages

2 x 5 litre containers.
