

## NOVA

Oven and hot plate cleaner.

### Features & Benefits

- Very efficient. Nova quickly and easily penetrates and removes baked on deposits.
- Easy to use. Apply to surface, allow to react and wipe off.
- Economical. Nova is highly concentrated, meaning it takes less product and less time to clean as normal oven cleaners.
- Does not contain solvents or other volatile compounds.

### Use Directions

Nova may be applied by spraying, brushing or wiping onto surfaces. Do NOT atomise if spraying.

Do NOT use on aluminium, tin, brass, pilot lights or painted surfaces as damage may occur.

Preheat equipment to 40 – 70°C. For removing burnt-on fats, grease and carbon use Nova undiluted. Allow it to penetrate for 5-15 minutes, then wipe with a damp cloth. Rinse thoroughly with water, or preferably a solution of 1 part vinegar to 10 parts water.

For grills and steak platters, dilute 1 litre of Nova with 2 litres of water.

For fryers, use at a dilution rate of 1:15 with water.

### Safety Directions

**WARNING: This substance is corrosive. Avoid contact with skin and eyes, rubber gloves and eye protection should be worn. Avoid inhaling spray mist – wear a face mask if applying by spraying.**

### First Aid:

If poisoning occurs, contact a Doctor or Poisons Information Centre. If swallowed, do NOT induce vomiting. Give a glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 10 minutes and see a doctor.

### Packages

2x5 litres, 20 litres containers
