

ODORFIX

Floating odour neutraliser for grease traps and ponds.

Introduction

Conventional deodorants are used to disguise bad odours by blanketing or masking them with a fragrance. Odorfix is totally new technology, which actually destroys bad odours.

Description

Odorfix is not soluble in water; when added to water Odorfix floats on the water and neutralises bad odours as they diffuse through the surface. Odorfix contains extracts from Australian plants dissolved in food grade canola oil.

Use Directions

- 1) For Grease Traps
500mls of Odorfix poured down a sink will treat 1000 litres of waste for seven days.
- 2) For Sluice Channels, Settling Ponds, Lagoons, Portable Toilets and Septic Tanks
Add 20-50mls per square metre of surface area.

Packages

2x5 litre cartons
