

TRIUMPH

Premium grade laundry powder.

Features & Benefits

- Contains new generation additives which swiftly remove soils and oil stains from synthetic fibres and cottons in either hot or cold water.
- Triumph is readily biodegradable
- Triumph restores brightness to whites and coloureds. It cleans and brightens in one operation.
- Triumph removes stains gently, yet thoroughly and can eliminate the need of a separate bleach cycle.
- In commercial laundries, the fast-wetting and free-rinsing properties permit shorter wash cycles.
- Triumph is a concentrated product which contains no inert fillers.
- It does not contain harsh chemicals and is safe to use on delicate drip-dry and permanent press fabrics.
- Triumph is a low foaming product – the suds level is controlled to minimise rinse cycles.

Use Directions

Triumph may be used on cottons and synthetics, coloured and whites. It should not be used to treat woollens.

Wash water may be cold, but best results are obtained with warm water. Wash water may be as hot as 70°C, depending on fabric.

For commercial laundries, Chemform provides appropriate wash cycles together with a card cutting service.

General recommendations are:-

- (a) Domestic Washing Machines
- | | | |
|--------------------|---|--------------------|
| Top loading type | : | 1½ scoops per load |
| Front loading type | : | ¾ scoops per load |
- (b) Commercial Laundries
- | | | |
|----------------|---|-------------------------------|
| Normal soiling | : | 2½ -3 scoops per 50 kilo load |
