

STAINLESS STEEL POLISH

FEATURES AND BENEFITS

- ❖ Stainless Steel Polish provides a very efficient one step method for polishing and protecting stainless steel surfaces.
- ❖ Easy to use. Just spray it on and wipe away. No scrubbing required.
- ❖ Versatile – can be used on stainless steel, formica, polished aluminum and porcelain.
- ❖ Reduces maintenance. As Stainless Steel Polish leaves an invisible protective film on surfaces, it reduces the need for frequent cleaning.
- ❖ Safe to use – Stainless Steel Polish does not contain harmful acids or solvents. It can be used with complete safety.
- ❖ Safe to the environment. The product does not contain phosphates and is completely biodegradable.

USE DIRECTIONS

Spray onto the surfaces, wipe with clean cloth.
